

RTS

RTS-POE-X016

Description

The RTS-POE-X016 provides power to the compatible RTS intercom panels through POE+. The unit provides 30watts of power. The unit makes it possible to place intercom panels at locations where power is difficult. It also makes it easy to roll out intercom at difficult locations, only a Ethernet cable is required. Development is done with Broadcast and events communications in mind.

Specs

Type:	Passive POE+ Splitter
Power Output:	24 Volts @ 1,5 volts
POE requirement:	IEEE802.3af/at – 30Watts
Data rates:	10Mbps / 100Mbps / 1Gbps
Connection:	3 Pin Mini Din Power Plug
Operating conditions:	Indoor Use
